SUMMARY

Flutter App Developer with hands-on experience building Android and iOS applications using Flutter. Proficient in Provider, BLoC, Cubit, REST API integration, Supabase, Firebase Authentication, Cloud Firestore, SQLite, and UI design with Material Design. Seeking a junior Flutter developer role.

TECHNICAL SKILLS

Flutter, Dart, Android, iOS, REST APIs, JSON,
Firebase Authentication, Cloud Firestore, SQLite,
Supabase, Hive, SQLite, SharedPreferences
Provider, BLoC, Cubit, Material Design,
Responsive UI, UIUX, Git, GitHub,
Unit Testing, Widget Testing, Debugging,
Agile, Scrum, Clean Architecture

SOFT SKILLS

Problem Solving, Communication, Team Collaboration,
Time Management, Adaptability, Self-Learning

PROJECTS

News App GitHub Repository

 - Developed a Flutter news application consuming REST APIs and parsing JSON data.
 - Displayed 20+ news articles per API request with category-based filtering.
 - Integrated 3+ API endpoints for headlines, categories, and search functionality.
 - Implemented loading, error, and empty states to enhance user experience.
 - Created responsive UI using Material Design principles.

Favorite Places App GitHub Repository

- Built a Flutter application to store and manage favorite places using local SQLite storage.
- Implemented full CRUD operations to add, view, and delete places.
- Used Provider to manage application state and keep the UI in sync.
- Designed responsive layouts and clean UI following Material Design guidelines.
- Supported storing and managing multiple saved locations with persistent local storage.

Quiz App GitHub Repository
- Built a Flutter quiz application with multiple questions and a scoring system.
- Applied state management to track user answers and quiz progress.
- Designed interactive UI screens with smooth question flow and automatic result calculation.
- Focused on clean UI, clear application logic, and a smooth user experience.
- Handled 10+ quiz questions with real-time score updates.

EXPERIENCE

Flutter Developer – Personal & Academic Projects   01/2025 – Present | Egypt
- Built and maintained multiple Flutter applications with structured navigation, routing, and responsive layouts.
- Integrated REST APIs and Firebase services to fetch and manage application data.
- Applied state management using Provider to handle UI updates and app logic.
- Used Git and GitHub for version control and project collaboration.
- Debugged runtime and UI issues to improve stability and code quality.
- Applied basic clean architecture principles and separation of concerns.

EDUCATION

Bachelor of Computer Science   2022 – Expected 2026
Suez Canal University
