SUMMARY

Flutter Developer with hands-on experience building cross-platform mobile applications using Clean Architecture and BLoC/Cubit state management. Experienced in integrating REST APIs, AI services, authentication, and location-based features. Focused on writing clean, maintainable code and continuously improving application quality.

SKILLS

Mobile Development: Flutter (Android & iOS), Dart, Material Design,

Responsive UI **Architecture & State Management:** Object-Oriented Programming (OOP), Clean Architecture, Feature-First Architecture, BLoC, Cubit, Provider

Backend & APIs: REST APIs, JSON, Dio, Supabase, Firebase (Auth, Firestore), JWT Authentication

Local Storage: Hive, SQLite, SharedPreferences

Tools & Quality: Git, GitHub, Debugging, Unit Testing, Widget Testing, Agile, Scrum

Soft Skills: Problem-solving, Communication, Team Collaboration, Adaptability

Maps & Location: Mapbox, Google Places API

Navigation & Dependency Injection: GoRouter, GetIt

PROJECTS

MindTrip – AI Travel Planning App | Flutter, Clean Architecture, REST APIs, Mapbox, AI [GitHub Link](#)

- Developed an AI-powered travel planning application using Flutter and Feature-First Clean Architecture.
- Built a conversational AI assistant that generates personalized multi-day travel itineraries based on user preferences, budget, travel style, and interests.
- Integrated REST APIs for authentication, AI-powered trip generation, destination recommendations, trip management, and user profiles.
- Implemented interactive maps, nearby place discovery, smart search, advanced filtering, and location-based recommendations using Mapbox and Google Places APIs.
- Developed comprehensive trip management features including itinerary organization, saved places, travel calendars, collaborative trip planning, and personalized recommendations.
- Applied BLoC/Cubit, GetIt, GoRouter, Dio, and Hive to build a scalable architecture with efficient state management, dependency injection, navigation, API integration, and offline data persistence.

Book Reading App | Flutter, Clean Architecture, BLoC/Cubit, Supabase

[GitHub Link](#)

- Structured the application into **3 Clean Architecture layers** (Data, Domain, Presentation) to ensure scalability and maintainability.
- Managed complex application state using **BLoC/Cubit**, enabling clear logic separation and efficient UI updates.
- Integrated **Supabase authentication and backend services** to handle secure user data management.
- Implemented **pagination** to efficiently handle large datasets and optimize API data fetching.
- Developed **5+ core features**, including user authentication, profile management, bookmarks, and reading progress tracking.
- Designed responsive UI following Material Design principles for consistent cross-platform experience

Quick Read - News App | News API, Real-Time Search, Categories

[GitHub Link](#)

- Developed a Flutter application integrating **3+ REST API endpoints** to fetch real-time headlines, categories, and search results.
- Managed application state using **BLoC/Cubit**, ensuring structured handling of loading, error, and empty states.
- Displayed **20+ articles per request**, implementing category-based filtering and real-time search functionality.
- Parsed and mapped JSON data efficiently to update the UI dynamically.
- Designed a responsive UI following Material Design principles for consistent cross-platform Experience.

Education

Bachelor of Computer Science:

Suez Canal University | 2022 – 2026

CERTIFICATIONS

Flutter & Dart – The Complete Guide (2025 Edition) – Udemy | 2025

[View Credential](#)

Flutter Master Course – Usama Elgendy | 2026

[View Credential](#)

Dart Programming & OOP – Usama Elgendy | 2026

[View Credential](#)

Frontend Web Development – ITI (Information Technology Institute), Egypt | 2025 [View Credential](#)
